

Muhammad Daniyal

Software Engineer | Full Stack Developer

☎ +92 327 3742924 | ✉ mdaniyal.tech@gmail.com | 🌐 github.com/mdaniyaldev | 📍 Karachi, Pakistan

Profile

Results-driven Software Engineer with professional experience in full-stack web development using React.js, JavaScript, Node.js, Express.js, PostgreSQL, and .NET MVC. Experienced in developing responsive web applications, integrating REST APIs, maintaining production websites, implementing CRM solutions, and deploying scalable applications on Microsoft Azure. Passionate about writing clean, maintainable code and building efficient software solutions that deliver excellent user experiences.

Work Experience

- BITS (Business Innovation Technologies)** September 2026 – Present
Full Stack Developer Remote
 - Studied requirements and designed UI/UX for Marketplace V1's core pages (home, listings, forms, profiles, inbox, admin panel), iterating based on team feedback.
 - Designed the system architecture for ITOM V1: use case flows, a 32-table database schema across 9 functional groups (Auth, Profiles, Content, Reference Data, Files & Visibility, Engagement, Review & Revision, Messaging, System) with full ERDs and a data dictionary, plus state management/status flows enforcing an admin-approval workflow.
 - Authored technical documentation on the recommended tech stack, hosting, and deployment strategy; reviewed PPM platform documentation/workflows and performed multiple rounds of QA testing.
 - Set up Docker and Supabase locally, then initialized a Next.js project for the Marketplace, building multiple pages and implementing routing logic.
 - Studied documentation and designed flow diagrams for a new project, ITOM (Idea-to-Market platform), and conducted related research.
- CityFM89 (Dawn Media)** August 2025 – September 2026
Software Engineer / Full Stack Developer Karachi, Pakistan
 - Developed and maintained React.js based web applications and internal web solutions.
 - Integrated and consumed REST APIs to connect frontend applications with backend services.
 - Maintained and enhanced company websites by implementing new features, fixing bugs, and improving overall performance.
 - Optimized existing frontend components to improve responsiveness, usability, and user experience across devices.
 - Worked closely with team members to analyze requirements, implement new functionality, and resolve production issues.
 - Performed application testing, debugging, deployment support, and ongoing website maintenance.
- AiTek Solutions** Nov 2024 – July 2025
Full Stack Developer Remote
 - Developed responsive and user-friendly websites using HTML, CSS, JavaScript, and modern frontend practices.
 - Built and maintained a customer portal using React.js, Node.js, Express.js, and PostgreSQL.
 - Implemented secure JWT-based authentication for user login, authorization, and protected routes.
 - Integrated GoHighLevel CRM to support lead management, automation workflows, and business operations.
 - Designed and connected REST APIs for frontend and backend communication.
 - Deployed and managed web applications on Microsoft Azure for improved accessibility and scalability.
 - Worked on debugging, performance improvements, and feature enhancements according to client requirements.

Technical Skills

- Programming Languages:** JavaScript, C#, Python, SQL, HTML, CSS
- Frontend Development:** React.js, Next.js, Tailwind CSS, HTML5, CSS3, JavaScript, Responsive Web Design
- Backend Development:** Node.js, Express.js, .NET MVC, REST APIs, Authentication, JWT
- Databases:** PostgreSQL, Supabase, MongoDB, SQL Server
- Cloud & Deployment:** Microsoft Azure, Docker, Web Hosting, Application Deployment
- CRM & Automation:** GoHighLevel CRM, Lead Management, Workflow Automation
- Tools & Platforms:** Git, GitHub, Visual Studio, VS Code, Antigravity, Postman
- AI Tools & Productivity:** ChatGPT, GitHub Copilot, Cursor IDE, Claude
- AI Skills:** Prompt Engineering, AI-assisted Debugging, Code Optimization, API Integration Support

Projects

- University Complaint Management System (Final Year Project)

Live Demo

 - Developed a full-stack University Complaint Management System using React.js, Supabase, PostgreSQL, Tailwind CSS, shadcn/ui, Twilio, and Resend.
 - Designed responsive and modern user interfaces using Tailwind CSS and shadcn/ui, ensuring an intuitive user experience across desktop and mobile devices.
 - Implemented secure authentication, protected routes, and role-based dashboards for Students, Coordinators, Deans, and Administrators using Supabase Authentication.
 - Built REST API integrations and validated endpoints using Postman to ensure reliable frontend-backend communication and efficient debugging.
 - Developed automated complaint routing, status tracking, and escalation workflows to improve complaint management efficiency.
 - Integrated Twilio for WhatsApp notifications and Resend for transactional email notifications to keep users informed about complaint status updates.
 - Implemented complete CRUD functionality, optimized PostgreSQL database queries, and improved overall application performance and scalability.
- Customer Portal Web Application

React.js, Node.js, Express.js, PostgreSQL | Live Demo

 - Developed a full-stack customer portal with secure login, protected routes, and role-based access structure.
 - Created backend APIs using Node.js and Express.js for data handling and user management.
 - Used PostgreSQL for structured data storage and efficient database operations.
 - Integrated frontend screens with backend services to provide a smooth user experience.
- GoHighLevel CRM Integration

GoHighLevel, APIs, Automation

 - Integrated GoHighLevel CRM features for lead tracking, automation, and customer workflow management.
 - Configured CRM automation flows to support business processes and improve lead handling.
 - Worked on API-based integration between web applications and CRM services.
- Responsive Business Websites

HTML, CSS, JavaScript

 - Designed and developed responsive websites for business and client requirements.
 - Focused on clean layouts, mobile-friendly design, browser compatibility, and performance optimization.
 - Improved website structure and usability through frontend enhancements.

Education

- PAF KIET

2021 – Expected 2026

BS Computer Science

Karachi, Pakistan
- D.J Science College

2017 – 2019

Intermediate - Pre-Engineering

Karachi, Pakistan

Certifications

- IBM Cloud Computing Fundamentals – IBM SkillsBuild
- Full Stack Development (MERN Stack) – NAVTTC
- ASP.NET Core MVC (Smart Pro) – Aptech

Core Strengths

- Full Stack Web Development
- REST API Development and Integration
- CRM Automation and Workflow Management
- Database Design and Query Handling
- Cloud Deployment and Application Hosting
- Problem Solving, Team Collaboration, and Client Requirement Understanding
